

Wemh ner Membranpress Universal 2000

Universal 2000 Variopin

This machine has a very high level of automation - the best for a cost saving production.

It was used in the last 8 years only 8 hours per week!!

So it is in really very nice condition. The software and the PLC were upgraded in 2005 to the newest version.

It is incl. automatic Pinsystem and the important point for the high quality production is - the machine can press with, without membranes and it can run also the simultaneously function.
